## BOOK SYNOPSIS

The Best Book On Learner Driver Training That I Have Ever Read Roger Seccombe \*  
Driving & Riding Professional Instructors Association This defensive driving text takes a learner driver from never having turned a vehicle ignition key before, through to going for their licence test, and much, much more, including skid control, emergencies, commentary driving, anticipation, concentration, observation, & stopping distances. The driving test is easy, staying alive on the roads is not. Learners, Instructors, parents or friends who wish to know 'how and what' to correctly and safely teach in 4 easy lessons, should read this book. Some time ago I read that the 17 to 25 year age group only make up 15% of our total population but account for a huge 35% to 40% of our road deaths. This statistic alone prompted me to write this book in an attempt to help parents to teach their children correctly and to give learner drivers a reference book so they will hopefully learn correctly from day one. This book has been written in an easy to understand way, with many useful illustrations to assist. Written by Award Winning former Australian Police Driving Instructor & Government Road Safety Adviser, Trevor Hobbs. Many Government & Private Testimonials For This Book REMEMBER - 90% of all motor vehicle crashes are caused by human error. this eBook is for driving on the right hand side of the road. Trevors version for driving on the left hand side is named Driving Test Education, and easily found here using those keywords This has been formatted for optimal viewing on the iPad and other tablets.
